

What Members are Saying About

Everyone I have dealt with at Cancer Guardian has provided empathy and much needed support during my journey after having been diagnosed with my illness. Their care and concern shines through in all that they have provided...allowing me to talk through my emotion, providing resources so I learn more about my rare illness, calling weekly to see how I am doing and if I am staying on track with my goals...and being by my side physically when visiting my doctor. I am extremely grateful and comforted to have them on my team...

Comprehensive Support When You Need It, Peace of Mind When You Don't

We all know someone who has been touched by cancer and the devastating impact of such a frightening diagnosis. Unfortunately, Americans born today have a 50% risk of being diagnosed during their lifetime.¹ Survival is directly tied to quality of care, but inequalities in our health system, whether financial, regional, or physician training, mean that you might not get access to the best cancer support options.

Protect yourself and your loved ones with Cancer Guardian, the most advanced cancer support program of our time.

Understanding your personal hereditary risk for developing cancer and having access to comprehensive cancer support is essential for you and your loved ones. Cancer Guardian will empower you to identify individual genetic risk and provide resources to support longer, healthier lives.

Finding cancer resources in health care systems is notoriously complicated. Cancer Guardian provides a comprehensive program, from support services, DNA testing, and technology needed to more effectively manage and navigate the confusing cancer landscape.

Time is of the essence in preventing and fighting cancer. Cancer Guardian provides day one benefits that can be utilized immediately, as well as valuable features that are made available if a cancer diagnosis occurs in the future.

Protect Yourself and Your Family with Advanced Cancer Support for Longer, Healthier Lives

Cancer Guardian is an innovative support program that can help in the prevention and management of cancer by combining the power of advanced DNA testing with the personalized support of expert cancer care resources.

Cancer Support Specialists

At any time, you have access to the Cancer Information Line to ask any cancer related questions, concerns, risk-mitigation strategies, or caregiving guidance. If diagnosed with cancer, you are provided with:

- A Dedicated Cancer Support Specialist
- Expert Pathology Review
- On-Site Nurse Advocate (one visit)

Advanced DNA Testing

Take preventative measures by understanding your genetic risk of cancer with the **Hereditary Risk Screening Test**. If you are diagnosed with cancer, fully-funded access to **Comprehensive Genomic Profiling** can help your doctor identify the most effective treatment options.

Navigation Technology

The cancer journey can be confusing and financially devastating. Cancer Guardian provides white-glove support through:

- Medical Records Platform
- Clinical Trial Explorer
- Financial Navigation

“

This benefit, out of all the point solutions out there, rises to the top of my list based on the support, resources, and top-quality experts. It was a life-saver for me as a caretaker for my dad.

Deb Smolensky
